SMART CONTRACT AUDITING

"Infusing responsibility into blockchain applications risking billions of dollars"
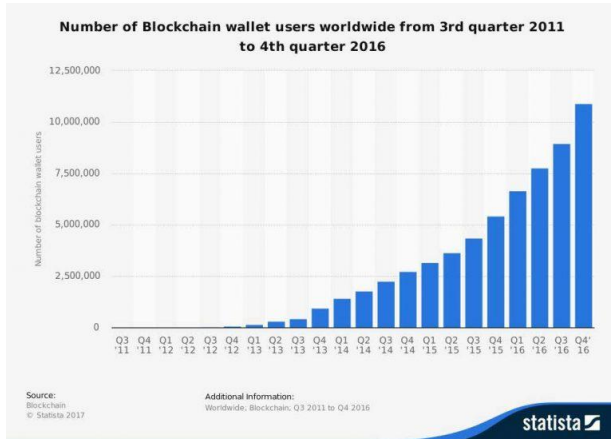

Billions of Dollars And Thousands of Businesses at Risk

Sensitive and Valuable Data at Risk

Growing User Base -> Growing Risk

X Vulnerable Contracts are a Ticking Time-Bomb for Users and Investors!

X Billions of Dollars at Risk

X Lack of Scalability

X Subpar Security Practices

X Users Losing Tokens and Data

Frederik Bussler
Founder & CEO
BSc Data Analytics*
Business Analyst, HPE
Machine Learning Research Analyst, Rare Genomics
Chief Data Officer, HealthDex
Blockchain Freelancing (Bitgrit, Blockgeeks, BigchainDB,
and Ethereum Enterprise Alliance)

Value Proposition

SMART CONTRACT AUDITING

01 Contact Blockchain Companies with Smart Contracts
- In need of validation and security
- To protect users and investors
- To infuse responsibility into their business

02 **Provide end-to-end Smart Contract Audits**
- Analyze vulnerabilities based on ALL known attacks
- Analyze interrelationships of code
- Use tested audit framework

03 **Offer Next Steps**
- Assist with protocol updates
- Recommendations to avoid contract failure
- Credibility for users and investors

1. A user purchases an audit and submits their smart contract

2. We run the contract through a **proprietary framework**, including attack vulnerability tests, analyzing contract complexity and failure preparation, external calls, and all known vulnerabilities

3. Combine **automated software analyses** with final manual inspection

SMART CONTRACT AUDITING

"The price of a professional audit from a reputable company could cost as much as **$50,000**"

Merunas Grincalaitis, Ethereum Expert

92,610 ERC20 Token Contracts
Etherscan
34,000 verified, active use contracts
Estimate **3,400 contract market share**

3,400 * 50,000 =

$170 million

(with 10x growth in last 6 months)

… $1.7 billion Q1 2019

Revenue Model

SMART CONTRACT AUDITING

1 - Audit Cost

Automation Fee

Enterprise Solutions
